## Examiner

- Doctoral and Masters Theses

## Intellectual Innovation and Major Academic Contributions

### 1 Health System Research

- 1.1 First Australian to employ large scale national data bases for the **econometric based modeling** of the supply, demand and price of medical and hospital services in Australia.
- 1.2 First and only studies testing the existence and magnitude of **supplier induced demand** in the Australian medical market.
- 1.3 The major Australian participant in the academic debate over **privatisation and deregulation** of health services.
- 1.4 Proposal and testing of a **theory of doctor induced ill health** based upon orthodox assumptions with respect to utility maximisation.

### 2 Economic Evaluation

- 2.1 International contribution to the **theory of indirect costs**.
- 2.2 International contribution to the analysis of health sector **objectives of cost utility analysis** (with colleagues in Norway, USA, UK and Spain).
- 2.3 Conduct of Australia's first **cost utility analysis** (with Jane Hall).
- 2.4 Contributor to the analysis of the **ethical dimensions** of cost utility analysis (*inter alia* with Peter Singer et al).

### 3 Utility Theory

- 3.1 Contributor to the world literature with respect to the **critique of orthodox utility theory**.
- 3.2 **Introduction of psychometric methods** into the construction of (Australia's first) multi attribute utility instrument (with Graeme Hawthorne).
- 3.3 Exploration of different **perspectives for utility measurement** (ex ante, ex post; public versus private; personal versus societal) (with Erik Nord; Joanna Cook).

### 4 Geographic Distribution

- 4.1 Proposal and testing of a **theory of distribution** which describes, *inter alia*, increasing inequality as the doctor supply increases.

## Policy Related Research

Price Elasticity  
Privatisation versus Deregulation  
Policy Reviews  
Conduct of Cost Utility Cost Effectiveness Analyses
